Workflow Construction

I want to create a dynamic music video that perfectly syncs with the rhythm of my favorite song.

Agent Graph

Agent Graph Generation   Automated Self-Iteration

Agent Graph Designer   *Concise Prompt*

Input: User Requirement and Registered Agents
1. Judge Feasibility
2. Design Executable Agent Graph: <Graph Definition>
3. Generate User Input Graph: <Graph Definition>
4. Generate Agent Chain: <Chain Definition>

Two-Phased Reviewer   *Self-Reflection*

To evaluate the candidate agent graph
Evaluation Criteria: < Criteria Definition>
Output pure JSON format: </answer>

Registered Agents   *Latent Neighborship*
